

FMC 2000

Wireless Multi-Channel Controller

The RAE Systems FMC 2000 is a multi-channel controller—with a built-in wireless modem—designed for integration with RAE Systems' MeshGuard intelligent network of connected sensors. The FMC 2000 is the command-and-control element of the MeshGuard system that gathers data and monitors alarms from MeshGuard toxic and flammable gas monitors. The built-in wireless modem automatically links with MeshGuard monitors, and the controller has built-in security safeguards to resist tampering.
